

100 Churches

Could your church hold a fund raising event?
----- to save habitat or species -----

**CEL is seeking
100 churches to
raise £100 each
for habitat
conservation
projects**

**Under threat of extinction:-
1/4 of the world's mammals
1/5 of the plants**

'The world's flora and fauna are a diverse genetic resource----which provides "Space Ship" Earth with its only viable life-support-systems--- and humankind with its only hope for a viable future' - *David Bellamy in foreword of the Gaia Atlas of Planet Management*

We want to show the world that Christians, not only care about people, but care about the gifts of nature God has given us – and care that future generations should enjoy them

If your church can raise £100 or more, please tell Christian Ecology Link..

"Whatsoever is good" – Philippians 4 v.8

See overleaf for:

1. Reasons why saving species & habitats improves the life of local people
2. Suggested projects to support

**Species extinction rates are now 1000 times as great
as the natural rate due to habitat loss**

Can you help? www.christian-ecology.org.uk/100churches

ChristianEcologyLink

100 Churches – page 2

Could your church hold a fund raising event?
----- to save habitat or species -----

Research looking for new species and medicines

Suggested projects to support:

1. World Land Trust,
2. Cool Earth
3. A Rocha International (This is a Christian organisation and includes forest projects in Kenya, Ghana, Asia and Peru)

£100 can buy an acre of rainforest or

- a bee-keeping kit –
- a wildlife ranger kit –
- enable a class to visit the forest – thus inspiring the next generation.

“Whatsoever is good” – Philippians 4 v.8

Many conservation projects directly benefit local people:

e.g. restoring mangrove swamps on which local fishermen depend for their livelihood as on the Mexican Oaxacan coast; and projects involved in re-afforestation to mitigate the devastating floods of the Ganges Delta or more recently in the Philippines, caused by loss of tree cover

Spending £1 to save rainforest from being destroyed can prevent 330kg carbon dioxide being produced – a better return on £1 for preventing climate change than any other way.

Left: “Trees are nature’s mother to the land – they protect and feed it. The land needs trees like a small child needs its mother.” Quote from “Our forest on Oku Mountain” educational leaflet in Cameroon

Right: These hills were once covered in forest. The soil is washed away and dries out once the trees are removed

If you can raise £100 or more and tell Christian Ecology Link, we will celebrate the fact by

- putting a link to you from the website,
- by sending you a certificate and thank you card.

We want to show the world that Christians care about the gifts God has given us – and care that future generations should enjoy them

Suggested projects to support include: World Land Trust, Cool Earth and A Rocha Ghana. (see <http://rainforest-save.blogspot.com>). If you support a church abroad, why not ask them about conservation projects near them, thus increasing both your and their awareness. More info:- 01729 822138 100churches@christian-ecology.org.uk
